

August 2019 LAB ALERT

Notification Date: 5 AUGUST 2019  
Effective Date: 19 SEPTEMBER 2019

## Collection requirement updates and new test builds for LabCorp

We are pleased to announce that our primary reference laboratory will change to LabCorp, or a LabCorp affiliated lab, effective September 19, 2019. SBMF clients need to account for two types of changes to update their systems.

- 1. Tests that do not require changes in your system (unless you maintain collection requirements):** SBMF will route a list of tests from their current send-out performing laboratory to either LabCorp or a LabCorp-affiliated lab, effective September 19, 2019. These test changes do not require a test re-build in your system. In some cases, collection requirements have changed and need to be updated in your systems. For these changes, please refer to the attached document titled "Re-directed orders with no new test build".
- 2. New test builds for interfaced clients (electronic orders and/or results interface):** Any new test build modification will require two things; adding the new test codes and removing the old test codes. The current test codes will be made inactive on September 19th, 2019. SBMF is committed to assisting customers in changing tests in their system. Please refer to the attached document titled "New build orders list" for the replacement order codes to build in your system. A utilization report will be provided to all interfaced clients in a separate e-mail. For further new test build information, please refer to SBMF's online [Test Catalog](http://www.sbmf.org) at [www.sbmf.org](http://www.sbmf.org). For inquiries regarding assistance with your test build or validation, please contact Joel Fletcher at [jfletcher@sbmf.org](mailto:jfletcher@sbmf.org) or at 574-204-4529.
