

E-CODES • LVDS Platelets

Notification Date: 26 MAY 2021

Effective Date: 01 OCT 2021

Large Volume Delayed Sampling (LVDS) – Platelets

The FDA issued guidance for mitigating bacterial contamination of platelets, effective October 1, 2021. One such option was Large Volume Delayed Sampling (LVDS).

Aerobic and Anaerobic testing on LVDS Platelets is done 48 hours after collection for 7 day expiration. Components are released after 12 hours with a negative reading.

SBMF does not have plans to produce LVDS platelets. In the event SBMF needs to import platelets, it will be important to have the following E-codes built in your system in order to receive this product.
